CERAMIC PRO KAVACA PPF

From the industry leader who brought you 9H, the original Ceramic Coating, comes the only true ceramic infused paint protection film.

Introducing KAVACA Ceramic Coated Paint Protection Film, combining our industry leading Ceramic Pro Nanotechnology with our Premium Self Healing Paint Protection Film to offer the best of both worlds for surface protection! The stain resistance of this advanced film will keep your vehicle cleaner longer, while offering protection against rocks and other flying debris it may face on the road.

KAVACA means armor in Sanskrit and acts as an invisible shield protecting your vehicle's painted surfaces.

AN ARMOR FOR THE SURFACE

OUR PACKAGES

KAVACA
CERAMIC COATED

The benefits of KAVACA Ceramic Coated do not stop at its amazing gloss, clarity, and defense against rock chips and debris. KAVACA Ceramic Coated is also the easiest film to maintain, cutting wash times in half due to the hydrophobic properties of our nanoceramic technology. The film offers both self cleaning and self healing! This means your vehicle will stay clean longer and cuts wash times significantly so you can spend less time cleaning and more time driving.

Why Choose Ceramic Coated PPF?

- **Extreme Gloss**
- **Ease of Maintenance**
- **Self Healing**
- **Industry Leading Protection**
- **Stain Resistance**
- **12 Year/Lifetime Warranty***

SURFACE PROTECTION REIMAGINED

KAVACA Ceramic Coated has been tested in some of the world's most intense environments and climates. From Dubai to Alaska we have found that it offers 30% more stain resistance than any of the top PPF brands. Bird droppings, pollen, tree sap and more are no match for the nanoceramic super hydrophobic Top Coat and any contaminants easily wash away.

We've taken our expertise in nanoceramic technology and reintroduced it in PPF to offer more protection while offering the industry leading Surface Protection available today.
