

**THE ORIGINAL  
CERAMIC  
COATING**

**CERAMIC Pro®**  
NANOCERAMIC TECHNOLOGY

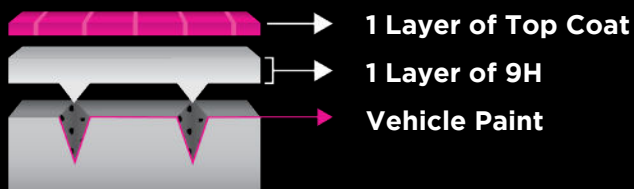

## THE MOST ADVANCED COATING SYSTEM

**Ceramic Pro nanoceramic coatings** are clear, liquid-based revolutionary formulas. Our proprietary nanotechnology permits the coating to penetrate and fill microscopic imperfections found in all porous materials. When cured, this technology will fuse on the surface to create a permanent, flat, durable, yet flexible glass shield.

What makes Ceramic Pro coatings different is the innovative technology based on ceramic molecular compounds (nanoceramics). Our proprietary SiO<sub>2</sub> formula is globally patented, and it has taken ten years of research and testing to bring the product to where it is today.

Ceramic Pro products have been extensively tested by SGS - the world's leading independent testing laboratory. Each of our ceramic coating solutions is certified as non-toxic. They are likewise certified as an organotin-free anti-fouling coating by the International Maritime Organization (IMO).

**REPELS WATER,  
DIRT & ROAD GRIME**

**PERMANENT  
PROTECTION**

**UV RESISTANCE**

**EXTREME GLOSS**

**RESISTS STAINS &  
CHEMICAL ETCHING**

**SUPERIOR  
HARDNESS**

Ceramic Pro coatings dramatically lower the surface tension preventing environmental contaminants such as bird droppings, bugs, dirt, tar, and graffiti paint from bonding to the substrate. Water easily removes dirt from the surface by encapsulating it into water beads that roll off the surface.

The complex nanotechnology used in the Ceramic Pro coatings product range allows the ceramic nanoparticles to fill the smallest pores in the paint making the coated surface flat, shiny, smooth, and extremely slick or hydrophobic. This is called the self-cleaning effect.

NANOCERAMIC COATINGS

**LEATHER & TEXTILE**  
For Interior Protection

**GLASS**  
On all window glasses

**WHEEL & CALIPER**  
For Wheels & Calipers

**9H & TOP COAT**  
On all painted surfaces

**PLASTIC**  
For all plastic trims

## Protect Your Car Against The Elements

Bug Guts

Tree Sap

Harsh Chemicals

Bird Droppings

UV/IR Rays

Acid Rain

### GOLD PACKAGE

Lifetime Warranty

**4 LAYERS 9H** - on painted surfaces

1 Layer

**TOP COAT** - on painted surfaces  
**9H** - on plastics  
**WHEEL & CALIPER** - on wheel face  
**GLASS** - on windshield

### SILVER PACKAGE

5-Year Warranty

**1 LAYER 9H** - on painted surfaces

1 Layer

**TOP COAT** - on painted surfaces  
**9H** - on plastics  
**WHEEL & CALIPER** - on wheel face  
**GLASS** - on windshield

### BRONZE PACKAGE

2-Year Warranty

1 Layer

**TOP COAT** - on painted surfaces  
**TOP COAT** - on plastic & wheels  
**GLASS** - on windshield

### ADD ON PACKAGES

**CERAMIC PRO SPORT ON PAINT**  
(6-Month Warranty)

**WHEELS OFF |**  
**WHEEL / CALIPER COATING**  
(3-Year Warranty)

Ceramic Pro is a forward-thinking organization. We have spent years developing revolutionary nanotechnology that is infused in each of our ceramic coating solutions. From industrial applications to custom formulated coatings in the automotive, marine, aviation, and commercial industries, Ceramic Pro has become the global leader.

Our product line-up includes a series of nanoceramic coatings for specific surfaces such as paint, glass, alloy, fabric, leather, plastic, and rubber. Whether you need protection for your daily driver, collectible car, boat, industrial equipment, or luxury handbags, Ceramic Pro authorized installers have a coating solution for you.
