

REVOLUTIONIZING THE WINDOW FILM INDUSTRY

Ceramic Pro is the Global Leader in vehicle and surface protection. KAVACA Window Films integrate nanotechnology used in our flagship coatings, coupled with precision manufacturing and superior quality materials to deliver the world's finest window tint to our valued customers.

Nanotechnology

KAVACA Ceramic IR contains a proprietary blend of nano-ceramic particles and IR blocking materials, which blocks up to 96 % of the infrared heat you feel.

UVA/UVB Protection

KAVACA Ceramic IR is engineered to reduce the potential of skin cancer and fading interior materials. SPF500 blocks 99+ percent of the damaging UV rays protecting you and your interior from the sun.

Zero Signal Interference

Radio, GPS, & Bluetooth signals will have zero interference due to nano-ceramic technology infused in our KAVACA Ceramic IR window film.

Custom Style Or Clarity

Customize your vehicle or add privacy with the multiple shades of KAVACA Ceramic IR. No sacrifice in clarity nor loss in heat rejection with clear VLTs.

Lifetime Warranty

KAVACA Ceramic IR is backed by a Carfax documented lifetime warranty against adhesive failure, peeling, delamination, fading and cracking.

NEXT LEVEL
OF WINDOW FILM

WINDOW TINT REDEFINED

KAVACA Ceramic IR is the next level of Window Film, manufactured with state-of-the-art technology. Ceramic Pro has infused a proprietary formulation of nano-ceramic technology with an IR layer to deliver excellent heat rejection, glare control, and UV protection that is metal-free, supporting signal clarity for all types of electronic devices.

KAVACA Ceramic IR lets you customize your vehicle with any of the six shades or VLTs offered without sacrificing clarity or the loss in heat rejection common with clear VLTs. KAVACA Ceramic IR's advanced technology offers a non-reflective, color-stable finish that will not fade over time.

KAVACA CERAMIC IR WINDOW FILM

Product Shade	5	15	25	35	45	55	70
Total Solar Energy Rejected %	67	65	60	56	50	50	45
Glare Reduction %	93	82	75	59	48	43	25
UV Rejection %	99.9	99.9	99.9	99.9	99.9	99.9	99.9
IR Rejection %	96	94	93	92	93	91	88
Visible Light Transmission %	8	17	24	36	46	53	70

The performance data above was tested according to ASTM & AIMCOL standards. All values represented are with film applied on 1/8" (3mm) glass.

Partnered with Carfax To Protect Vehicle Values

KAVACA Ceramic IR uses a combination of the newest technologies in heat rejection and thermal conductivity. Our KAVACA CERAMIC IR product line uses transparent nano-ceramic particles that do not affect the VLT. This technology enables the KAVACA Ceramic IR to block over 99 percent of the UV Rays and 88 to 96 percent of infrared heat, depending on the VLT.

Unlike other companies, we do not use metal or crystalline particles in our film, which can cause problems such as - light reflection, reduced radio transmissions, increased glare from your windows, and spotty cellular signals.

Using nano-ceramic particles in KAVACA Ceramic IR, the energy from the sun is absorbed, creating a more comfortable cabin temperature and a rich, dark appearance. The result is crisp GPS reception and reliable cell phone service.
